JOB DESCRIPTION

Are you interested in working with leading-edge solutions and technologies? Do you have the passion to build a career helping companies make positive, lasting changes? Are you motivated by being a part of the next major wave of transformational IT technologies?

We are looking for a Decision Management Consultant to join our national consultancy practice. Our Consultants create innovative robust IT architectures and solutions that help our clients improve operations, reduce costs and create competitive advantage.

An ideal candidate will have a degree in Computer Science (or equivalent), a strong background in Java, .NET or COBOL, business analysis, and have working knowledge of application servers, Service-Oriented Architectures and development frameworks.

An exceptional candidate will have a strong foundation in mathematics including statistical modeling and optimization theory. Advanced mathematics degrees are highly desirable, though not mandatory.

Additional desired skills and experience:

- Knowledge of predictive models
- Decisioning technologies including business rules, predictive analytics and decision optimization
- Database integration technologies
- XML and RDBMS
- Exemplary customer-facing skills
- Proficiency in at least one major Decision Management vendor technology including FICO, IBM, JBoss or Oracle
